A Complete Index to

METALS and ALLOYS

Volumes 17 and 18

January-December 1943, inclusive

This is a complete index of the contents of METALS AND ALLOYS for volumes 17 and 18—the January to December 1943 issues, inclusive. It covers not only the feature articles and the digests, but all the departments (Production Front, Editorial Comment, Shop Notes, News, Books, and Trends) as well. All items are indexed not only under their titles or specific subjects, but are also grouped and indexed under the major broad subdivisions of the magazine's field.

The department in which the item appears is indicated in each entry by words as "(digest)", "(news)", etc., following the subject or author. Where a department is not thus indicated, the indexed item was a feature article. The reference numeration indicates, first, the page number, which is continuous throughout each volume; second, the volume number; and third, the issue number showing the month in which the item appeared. Thus, the reference number 1178:17-6 indicates that the indexed article is to be found on page 1178 of volume 17 (Jan.-June 1943) in the June issue, and the reference 110:18-1 indicates the article on page 110 of volume 18 (July-Dec. 1943) in the July issue.

—The Editors.

SUBJECT and TITLE INDEX

Abrasive cloth tools, Sidford A. J. (digest)—1144:18-5
Abrasive-wheel cutting, Heinz, W. B. (digest)—618:17-3
Accident rates rise sharply (production front)—698:17-4
"Achievement award" postponed, Metals and Alloys' first (editorial)—751:17-4
Achievements in metal production, Cone, Edwin F.—768:18-4
Adapter for hole punching units (news)—190:18-1
Adhesives:
  Bonds for metals (digest)—894:18-4
  Joining metals with (digest)—138:18-1
Adventures on the production front (editorial)—1061:18-5
Advertisers view post-war (production front)—1135:17-6
Air blast barrel for descaling (news)—1336:17-6
Air conditioning apparatus (news)—1332:17-6
Air - conditioned spectography (shop notes)—82:18-1
Abrasive belts:
  Grinders (news)—624:18-3
  Surface coated (news)—448:17-2
Air hammers for forging (digest)—172:17-1
Air salvages chips into barrel, Greene, Roger (shop notes)—787:17-4
Aircraft and engines:
  Alloy steel in (production front)—476:17-3
  Brushes, ban fissures and failures (news)—448:17-2
  Aluminum, quality of (digest)—580:17-3
  Anodizing:
    Chromic acid, Tubbs, L. G. (digest)—114:18-1
    In Germany (digest)—390:17-2
  Arc welding of magnesium aircraft structures, Pavlecka, V. H., and Northrop, John K.—302:18-2
  Castings (digest)—872:17-2
    Aluminum, automatic-hydrogen repairs, Beaudoin, H. A., (shop notes)—321:18-2
    Aluminum, sound, Bremer, Edwin (digest)—346:18-2
    Cleaning machine for (news)—630:18-3
    Precision, Wolf, J. D.—784:18-4
    Propeller, metal used for (news)—1098:17-5
    Radiography of, Katz, Robert (digest)—928:18-4
  Cleaning in aircraft production, Saunders, Ray (digest)—1049:17-5
  Cleaning machines for engines (news)—976:18-4
Aircraft and engines (Cont.):
  Cowls made by spinning (news)—234:17-1
  Crankshafts, induction heating (news) 246:17-1
  Cylinder heads, mass production of (digest)—1014:17-5
  Dies made of plastic, Schlenzig, B. (digest)—814:17-4
  Exhaust manifolds, making (digest)—154:17-1
  Forging aluminum parts, Geschelin, J., (digest)—1396:18-6
  Gages, strain (news)—244:17-1
  German aircraft alloy, new, Petri, H. G., Siebel, G., and Vosskuehler, H., (digest)—1422:18-6
  Jigs and fixtures, welded, Wenger, Harry V., Jr. (digest)—1258:17-6
  Joining methods compared, Buckwalter, T. V., and Horges, O. J. (digest)—822:17-4
  Light metal casting alloys (file facts)—1347:18-6
  Magnesium in aircraft (trends)—276:17-1
  Metal finishing of aircraft, Irwin, E. R., and Teres, J. (digest)—1034:17-5
  Metals in a German aero engine, Oldberg, Sidney, and Ball, Thomas M. (digest)—404:17-2
  New engine materials, Young, Mel, and Hanink, Herman H. (digest)—144:18-1
  Nitriding crankshafts, furnaces for (news)—1206:18-5
  Oil viscosity and cylinder wear, Everett, H. A. (digest)—598:18-3
